Sprint Report

Πηνελόπη Ελευθεριάδη 3221
Αθανασία-Δανάη Τσαούση 3349

VERSIONS HISTORY

Date	Version	Description	Author
11/03/21	1	Οργάνωση και πλano εκτελεσης εργασιας	Ελευθεριάδη Πηνελόπη Αθανασία-Δανάη Τσαούση
16/03/21	2	Υλοποίηση πακέτων και οργάνωση κλάσεων	
23/03/21	3	Υλοποίηση TTSTFacade και την τεσταρισμα με την <code>Text2SpeechEditorAppView</code> ,μετατρεποντας ενα String σε audio.	
6/04/21	4	Υλοποίηση κλάσεων για μορφη αρχείου και decoding.Επίσης,υλοποίηση κλάσεων για πακέτο commands.	
13/04/21	5		
19/04/21	6	Υλοποίηση κλάσεων για το πακέτο output(ExcelWriter, WordWriter)	
28/04/21	7	Υλοποίηση κλάσεων για το πακέτο output(AtBashDecorator, Rot13Decorator).	
3/05/21	8	Έλεγχος κλάσεων των πακέτων input,output.	
11/05/21	9	Αλλαγές στις κλάσεις του πακέτου commands και της κλάσης Document.	

17/05/21	10	Έλεγχος input μέσω του menu στην Text2SpeechEditorAppView.
18/05/21	11	Έλεγχος input μέσω του menu στην Text2SpeechEditorAppView.
20/05/21	12	Προσθήκη νέου παραθύρου όταν επιλεγθεί το button edit ώστε να γίνεται επεξεργασία του κειμένου.
21/05/21	13	Προσθήκη νέου button στο παράθυρο της edit για την αποθήκευση των αλλαγών.
23/05/21	14	Επίλυση προβλημάτων στα πακέτα input,output.
24/05/21	15	Επίλυση προβλημάτων στα πακέτα input,output.
25/05/21	16	Επίλυση προβλημάτων στα πακέτα input,output.
26/05/21	17	Προσθήκη μεθόδων για αναπαραγωγή και επανάληψη των περιεχομένων του αρχείου με τις μεθόδους play() και replayAudio στην κλάση Text2SpeechEditorAppView.

Introduction

Με αυτό το report δίνουμε πληροφορίες για την εφαρμογή Text2SpeechEditorAppView.
Η εφαρμογή αυτή διαβάζει αρχεία και τα μετατρέπει σε audio. Για το διάβασμα και την εξαγωγή αρχείων υπάρχουν επιλογές για την μορφή του : Excel και Word. Επιπλέον, υπάρχει δυνατότητα κωδικοποίησης και αποκωδικοποίησης με δύο στρατηγικές : Rot13 και AtBash.

Scrum team and Sprint Backlog

<For the user stories included in this release specify below corresponding tests using a typical tabular form.>

Scrum team

Product Owner	Apostolos Zarras
Scrum Master	Πηνελόπη Ελευθεριάδη Αθανασία-Δανάη Τσαούση
Development Team	Πηνελόπη Ελευθεριάδη Αθανασία-Δανάη Τσαούση

Sprints

Sprint No	Begin Date	End Date	Number of weeks	User stories
1	23/04/21		1	TTSFacade
2	06/04/21		3	Input package
3	19/04/21		1	commands
4	19/04/21		4	Output package
5	18/05/21	28/05/21	5	Text2SpeechEditorAppView

Use Cases

<Use Case 1>

Use case ID	OpenDocument
Actors	User
Pre conditions	There is a file to open
Main flow of events	<ol style="list-style-type: none">1. The user clicks on the OPEN button2. The use case opens a window3. User inputs the path of the file4. The use case opens a window with choises(Rot13,AtBash,NoEncoding)5. User chooses the decoding strategy
Post conditions	The content of the file appears on under the menu .

<Use Case 2>

Use case ID	EditDocument
Actors	User
Pre conditions	
Main flow of events	<ol style="list-style-type: none">1.The user clicks on the EDIT button2.The use case opens a window3.User edits the content using the window that appeared4.The use case has a button “SAVE “5.If the user wants to save the edited contents clicks this button
Post conditions	The save windows appear.

<Use Case 3>

Use case ID	SaveDocument
Actors	User
Main flow of events	<ol style="list-style-type: none">1.The user clicks on the SAVE button2.The use case opens a window3.User chooses the path of the file4.The use case opens a window with choices(Rot13,AtBash,NoEncoding)5.User chooses the encoding strategy
Post conditions	

<Use Case 3>

Use case ID	ExitDocument
Actors	User
Main flow of events	1.The user clicks on the EXIT button 2.The app closes .

<Use Case 4>

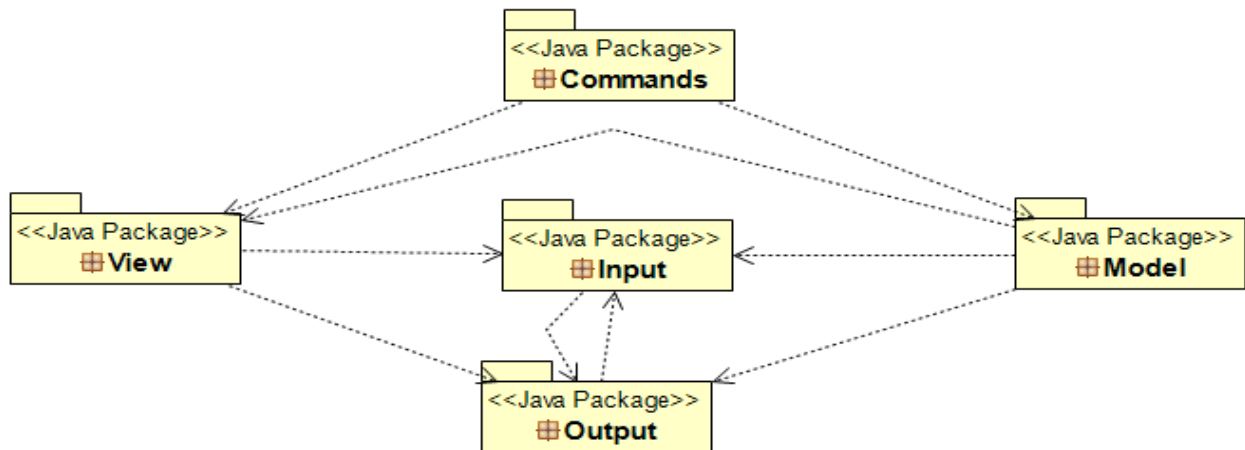

Use case ID	Audio
Actors	User
Pre conditions	A file has been opened.
Main flow of events	1.The user clicks on the AUDIO button 2.The use case plays the contents of the file.

<Use Case 5>

Use case ID	Replay
Actors	User
Pre conditions	A file has been opened.
Main flow of events	<div>1.The user clicks on the REPLAY button</div> <div>2.The use case replays the contents of the file.</div>

Architecture

Design

Package Input Diagram

Class Name: <code>DocumentReader</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ interface that is implemented by file opening strategies, which parse the file formats (.docx, .xlsx) 	Collaborations:

Class Name: <code>ReaderDecorator</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ allow to easily combine a decoding strategy with a particular file opening strategy ▪ has different implementations, one for each different decoding strategy 	Collaborations: <ul style="list-style-type: none"> ▪ <code>DocumentReader</code>

Class Name: <code>AtBashDecorator</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Responsible for AtBash decoding. 	Collaborations: <ul style="list-style-type: none"> ▪ <code>ReaderDecorator</code> ▪ <code>DocumentReader</code>

Class Name: <code>Rot13Decorator</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Responsible for Rot13 decoding. 	Collaborations: <ul style="list-style-type: none"> ▪ <code>ReaderDecorator</code> ▪ <code>DocumentReader</code>

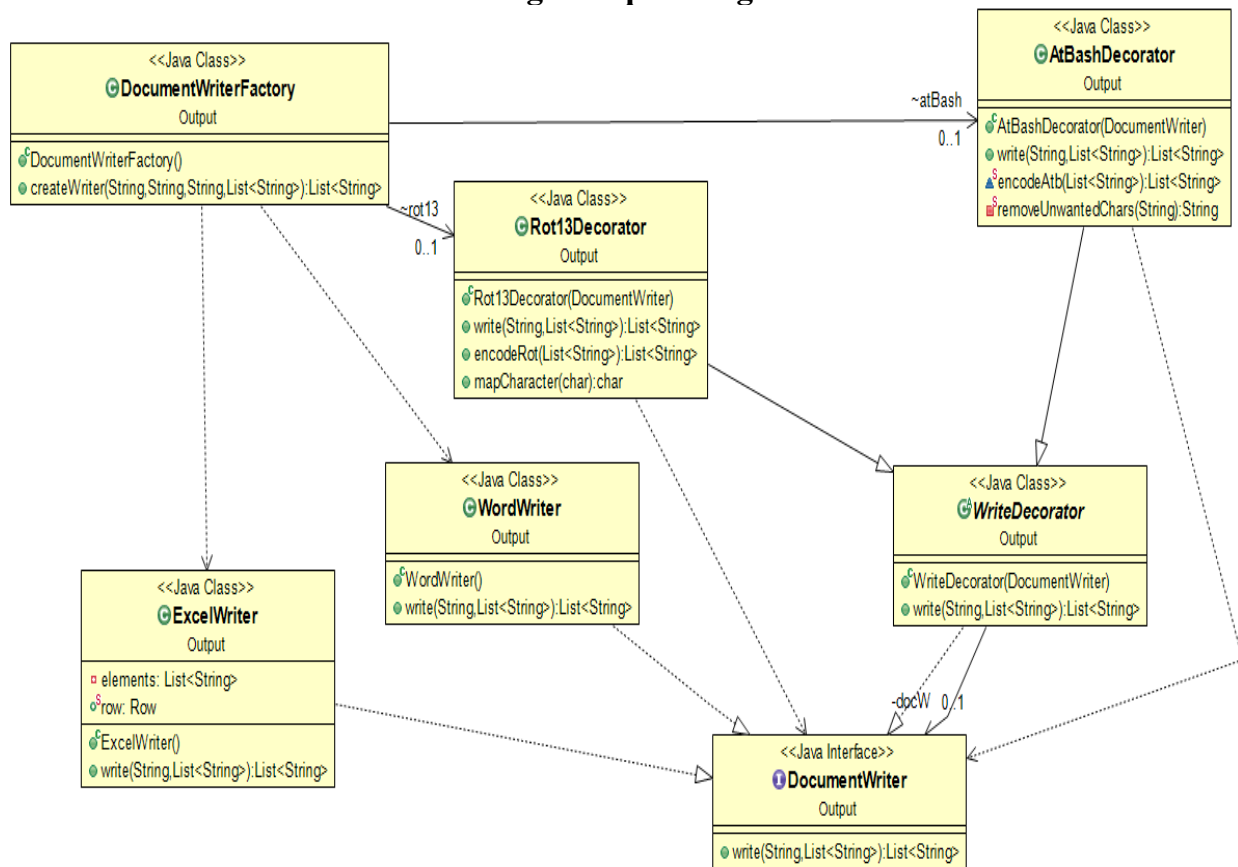

Class Name: <code>DocumentReaderFactory</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ provides a parameterized factory method 	Collaborations: <ul style="list-style-type: none"> ▪ <code>AtBashDecorator</code> ▪ <code>Rot13Decorator</code> ▪ <code>WordReader</code> ▪ <code>ExcelReader</code>

--	--

Class Name: ExcelReader	
Responsibilities: <ul style="list-style-type: none"> ▪ Reads .xlsx files 	Collaborations: <ul style="list-style-type: none"> ▪ DocumentReader

Class Name: WordReader	
Responsibilities: <ul style="list-style-type: none"> ▪ Reads docx files 	Collaborations: <ul style="list-style-type: none"> ▪ DocumentReader

Package Output Diagram

Class Name: DocumentWriter

Responsibilities:

- interface that writes data to the file formats (.docx, .xlsx)

Collaborations:

Class Name: WriterDecorator

Responsibilities:

- allow to easily combine a decoding strategy with a particular file writing strategy
- has different implementations, one for each different decoding strategy

Collaborations:

- DocumentWriter**

Class Name: <code>AtBashDecorator</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Responsible for AtBash decoding. 	Collaborations: <ul style="list-style-type: none"> ▪ <code>WriterDecorator</code> ▪ <code>DocumentWriter</code>

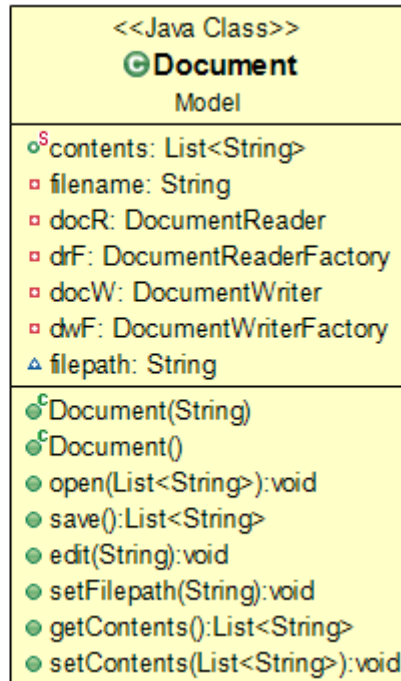

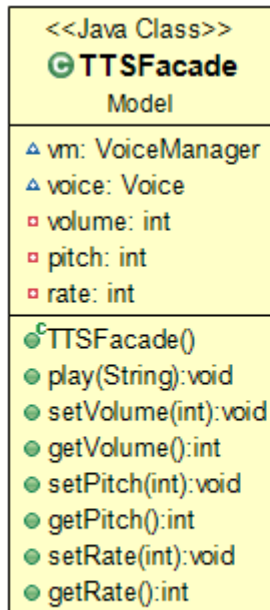

Class Name: <code>Rot13Decorator</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Responsible for Rot13 decoding. 	Collaborations: <ul style="list-style-type: none"> ▪ <code>WriterDecorator</code> ▪ <code>DocumentWriter</code>

Class Name: <code>DocumentWriterFactory</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ provides a parameterized factory method 	Collaborations: <ul style="list-style-type: none"> ▪ <code>AtBashDecorator</code> ▪ <code>Rot13Decorator</code> ▪ <code>WordWriter</code> ▪ <code>ExcelWriter</code>

Class Name: <code>ExcelWriter</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Writes .xlsx files 	Collaborations: <ul style="list-style-type: none"> ▪ <code>DocumentWriter</code>

Class Name: <code>WordWriter</code>	
Responsibilities: <ul style="list-style-type: none"> ▪ Writes .docx files 	Collaborations: <ul style="list-style-type: none"> ▪ <code>DocumentWriter</code>

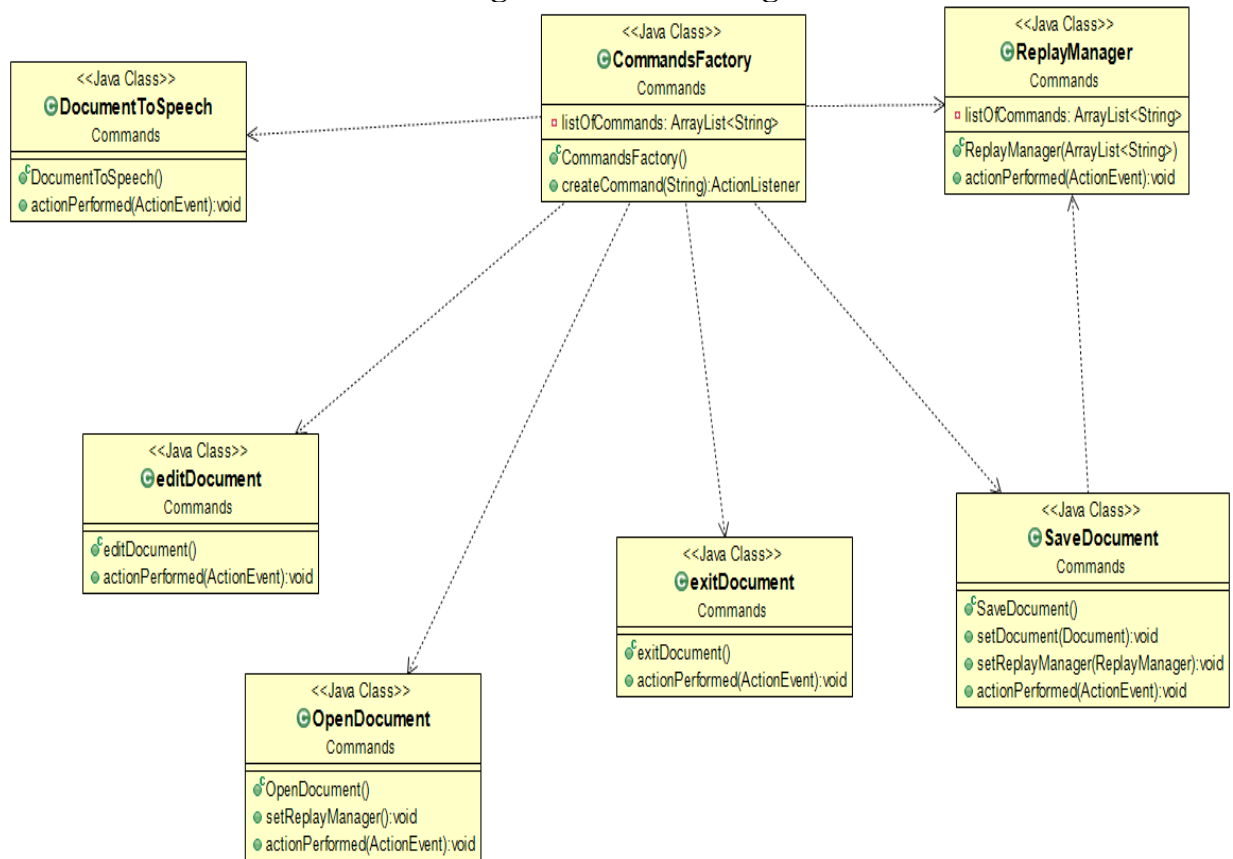

Package Model Diagram

Class Name: Document	
Responsibilities:	Collaborations:
<ul style="list-style-type: none"> Represents a document with contents. 	

Class Name: TTSFacade	
Responsibilities:	Collaborations:
<ul style="list-style-type: none"> Responsible for converting text to audio. 	

Package Commands Diagram

Class Name: **CommandsFactory**

Responsibilities:

- provides a parameterized factory method when a button is pressed.

Collaborations:

- editDocument**
- DocumentToSpeech**
- OpenDocument**
- exitDocument**
- ReplayManager**
- SaveDocument**

Class Name: **editDocument**

Responsibilities:

- calls **Text2SpeechEditorAppView** to edit the contents of the file

Collaborations:

--	--

Class Name: <u>DocumentToSpeech</u>	
Responsibilities: <ul style="list-style-type: none"> calls Text2SpeechEditorAppView to convert the contents of the file to audio. 	Collaborations:

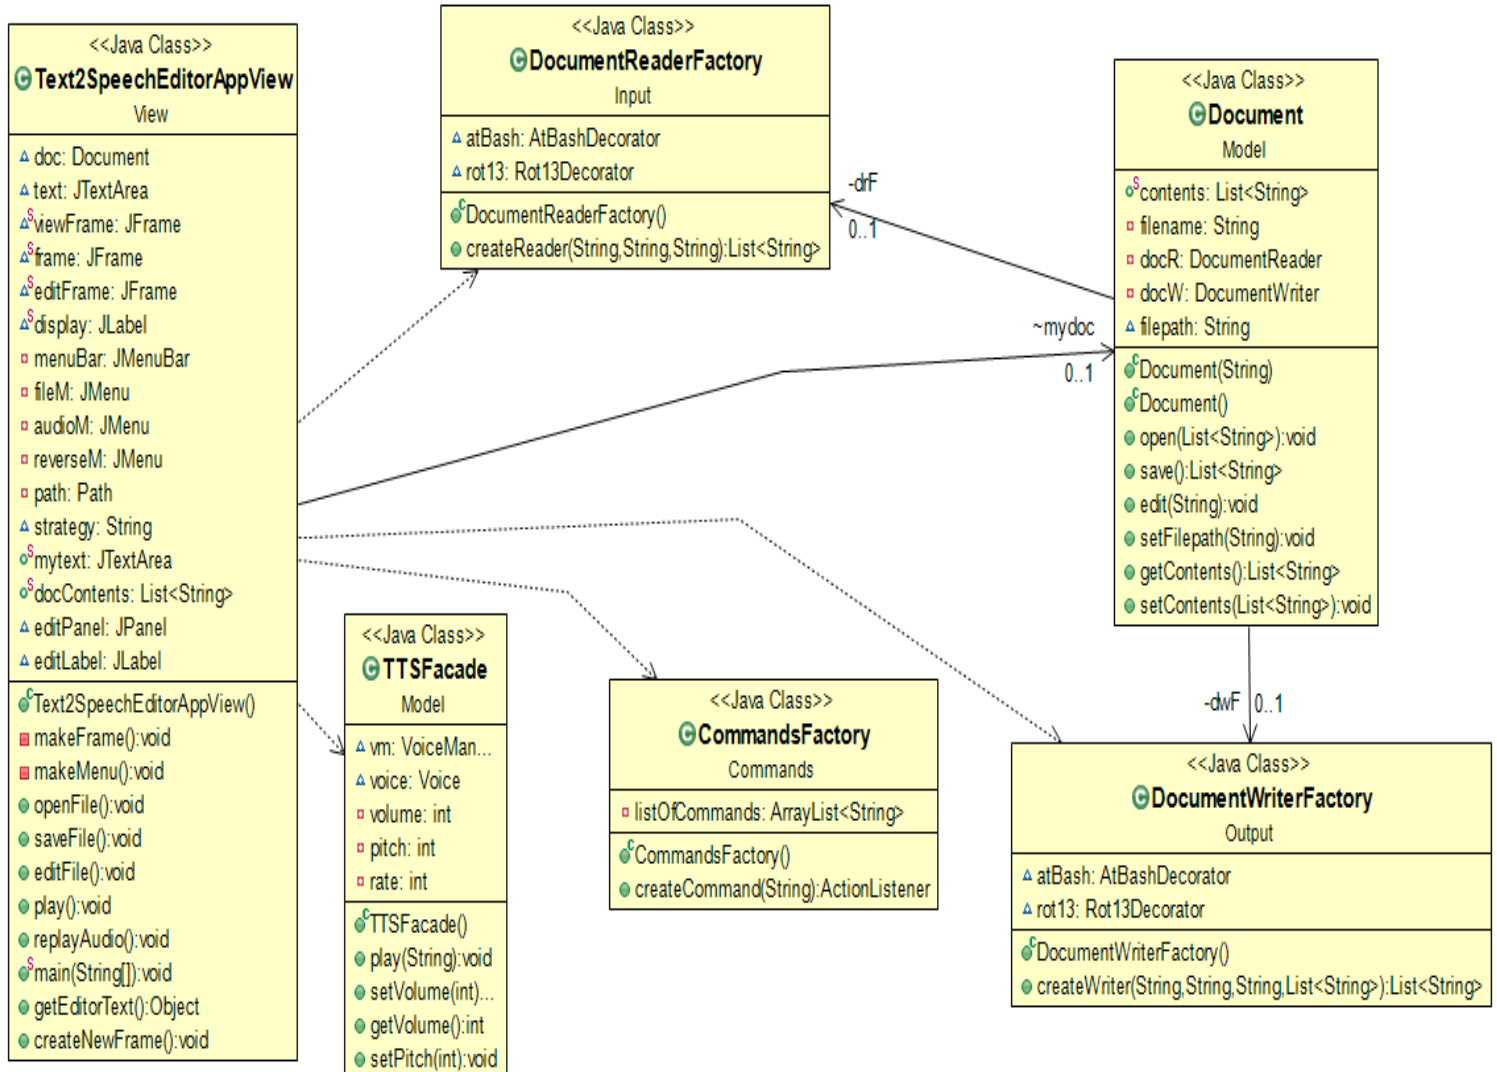

Class Name: <u>OpenDocument</u>	
Responsibilities: <ul style="list-style-type: none"> calls Text2SpeechEditorAppView to open the file. 	Collaborations:

Class Name: <u>exitDocument</u>	
Responsibilities: <ul style="list-style-type: none"> calls Text2SpeechEditorAppView to exit the app. 	Collaborations:

Class Name: <u>ReplayManager</u>	
Responsibilities: <ul style="list-style-type: none"> calls Text2SpeechEditorAppView to replay the contents of the file. 	Collaborations:

Class Name: <u>SaveDocument</u>	
Responsibilities: <ul style="list-style-type: none"> calls Text2SpeechEditorAppView to save the contents of the file. 	Collaborations:

Package View Diagram

Class Name: Text2SpeechEditorAppView

Responsibilities:

- Has the User Interface(menu)
- Connects buttons with the correct ActionListeners

Collaborations:

- DocumentReaderFactory
- DocumentWriterFactory
- Document
- CommandsFactory
- TTSFacade
